Sample Wiring Diagram

Features & Benefits

Direct calls from multiple phones: 8 phones per EMS5 unit is a money saving feature
Also saves cost associated with monthly phone line charges by reducing the number of phone lines required: up to **64** devices on one telephone line

Superior functionality:

- Messages can be customized by end user
- Priority to calls coming from car phone
- Digital display on Master Station phone shows where the call is coming from
- Flexible system allows multiple Master Station phones
- Call routing can be customized. Can dial up to 3 numbers: on-site first, then on-site or off-site or off-site according to building user needs

Conforms with code requirements:

- When used in conjunction with and ACMS (Automated Call Management System) the ACMS can **log and record all calls**, automatically test and provide diagnostics for all phones and centrally program all phones
