LTC Intercoms

Providing Passenger Safety that is Second to None

The LTC Intercom Systems are stand alone systems that are dedicated point to point communication. They are made to provide communication between lobby or hall station and the elevator. Machine room to car communication is also available in this format. The units provide push to talk button and allow direct communication to the car. No phone line is required. These units run off of battery power and recharge during stand by mode. Available in flush, surface mount and wall phone units. Each system needs one ceiling mount unit (CMU) for each elevator car.

#### LTC Intercom

*The LTC Intercom is the lowest price point to point communications system with no phone line required.*

#### Features & Benefits

- Low price point
- Easy installation
- Point to point communication with no phone line
- Communication for emergency personnel
- Code compliant solution for machine room to car communication
- Car unit drop in mounting / no need to modify car
- CMU's available in COP mount configuration if requested

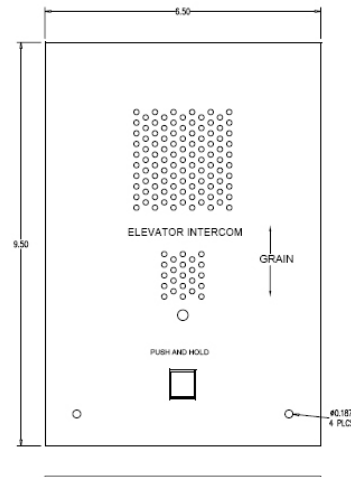

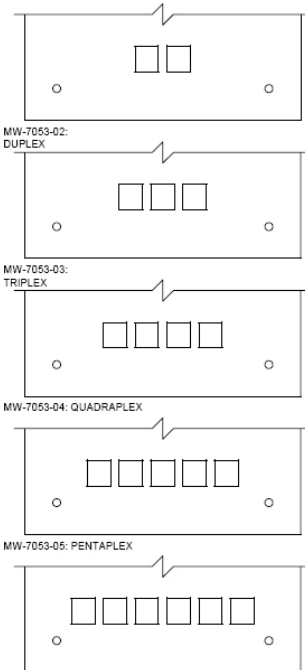

# Janus Elevator Products Inc.

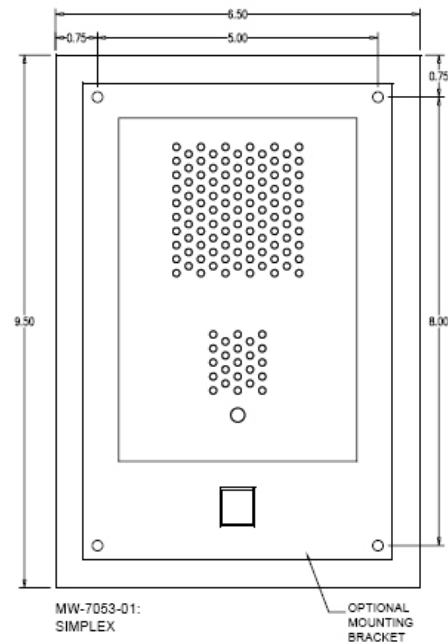

## Specifications
