# SHW Master Station

Providing Passenger Safety that is Second to None

The newly enhanced SHW Master Station Phone provides two way communication between the lobby or fire control room and the elevator phones on an EMS5 System. Once a call is placed from an elevator phone, the call will be directed to the SHW phone. The digital display will show the number of the elevator calling. If the call is not answered in a preset time, 30 seconds for example, the call will be directed to your choice of preprogrammed numbers.

**Master Station Phone**  
**Model # SHW shown above**  
(shown with optional desk stand)

*The newly enhanced SHW provides two way communication between a lobby or fire control area and the elevator phone.*

## Features & Benefits

### **Flexible system:**

- On-site answering of calls from phones on the EMS5 unit
- Multiple master stations can be used on a system
- A master station combined with the EMS5 system can operate *without* a phone line, where 24 hour on-site monitoring is used.

### **Information and security driven:**

- Digital display shows origin of call
- Allows onsite communication between Master Station and all other devices

### **Conforms with code requirements:**

- ASME 2008 (U.S.) and B44 (Canada)

### **Functional and Attractive:**

- Multiple styles available: wall mount, flush mount, desk set and hands-free
- Durable, attractive phone available in stainless or muntz finish

# Janus Elevator Products Inc.

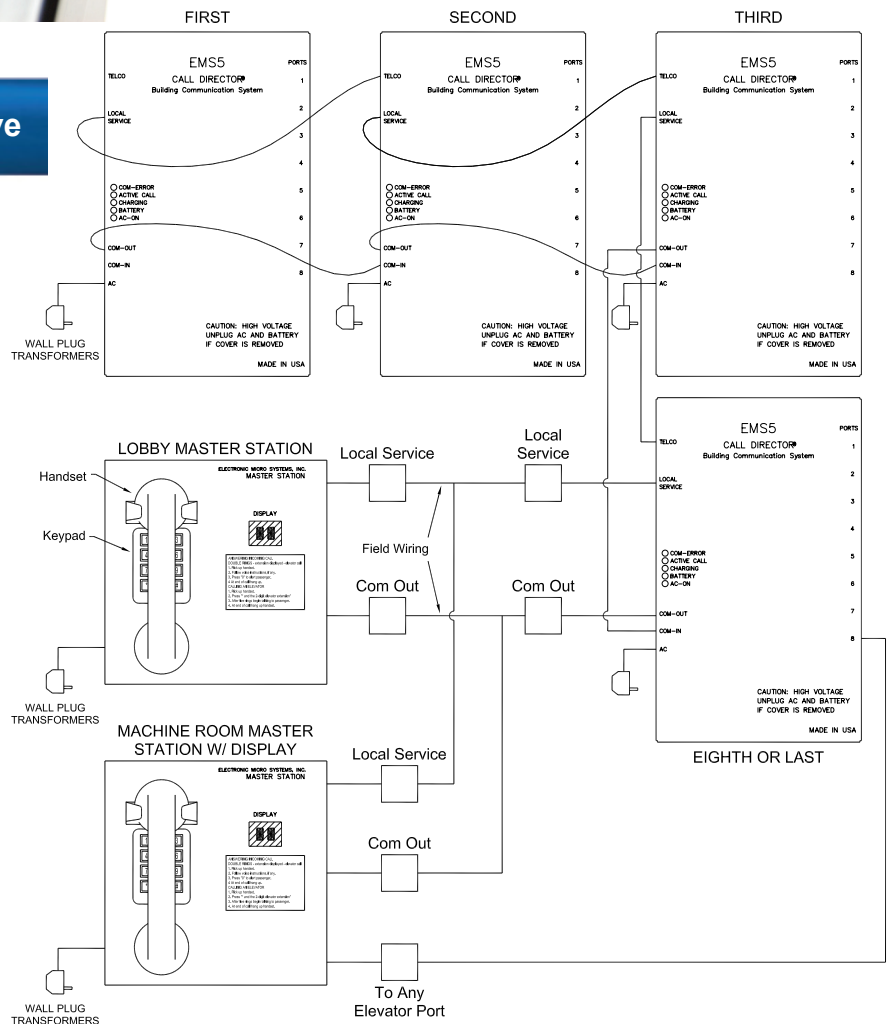

## Specifications
