

VANGUARD

24V Elevator Fixtures

The pre-engineered design of the new Vanguard line of fixtures puts you back in control of your job schedule. You choose the layout, cost out the fixtures, and plan your manpower needs based on guaranteed delivery. Easy and fast, Vanguard simplifies your life.

Vanguard's durable and damage resistant 304 stainless steel fixtures minimize maintenance requirements. Special features include stainless steel pushbuttons, with long life blue LED illumination and studless design,

sensible solutions for your fixture needs

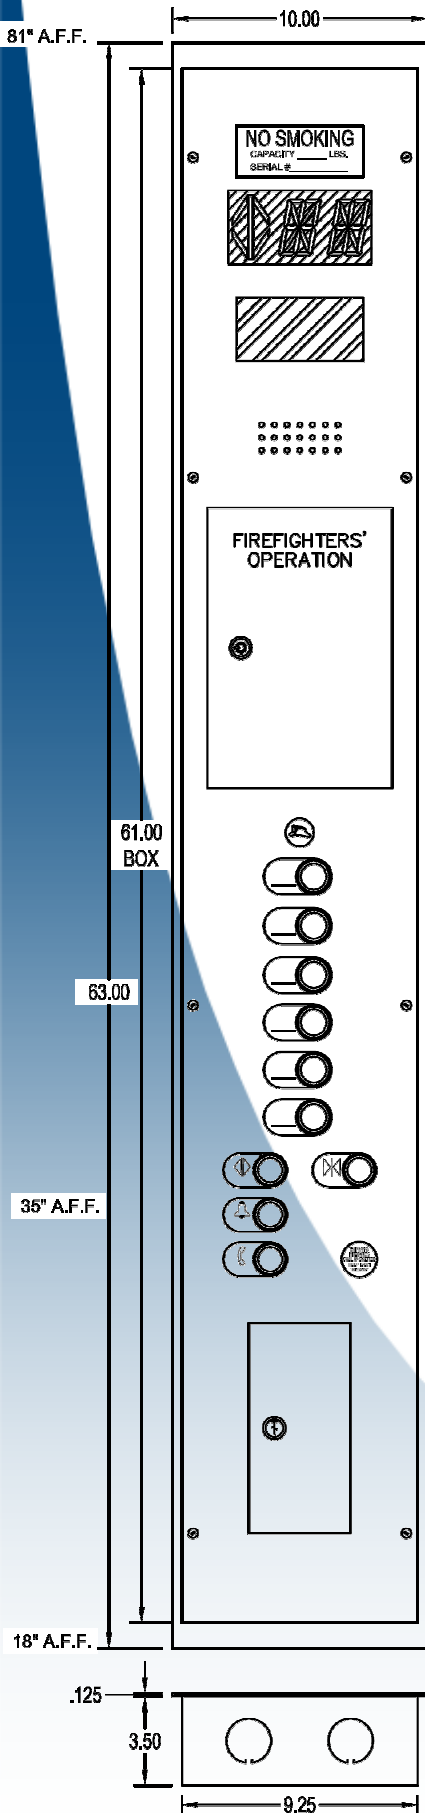

Standard drawing and pricing sheets make it easy to quickly design and calculate the cost of a package that fits your project needs and budget. And shipment is guaranteed within three weeks of order receipt.¹

Our 24-volt Vanguard line is in full compliance with all U.S. and Canadian National Fire Service codes, as well as all ADA code requirements for Braille.

¹ Shipment guaranteed within 15 working days or Janus Elevator pays for freight charges.

VANGUARD HELPS GET YOUR JOB COMPLETED ON TIME AND ON BUDGET

The Vanguard standard 24-volt car stations are constructed of durable, attractive, #4 pre-finished 304 stainless steel, which has excellent resistance to corrosion and oxidation.

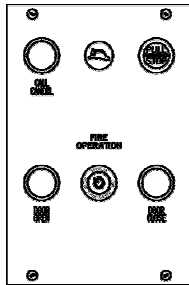

Package options are available for up to 12 stops (any combination of front and rear entrances). The car operating panel meets ASME 17.1 2004/2007.

Digital display, hands-free phone, and fire service cabinet are standard on all car operating panels and included in the base price. Vanguard pushbuttons are illuminated with a blue LED halo as standard. Hall lanterns are available with a choice of red, green, or white LED illumination.

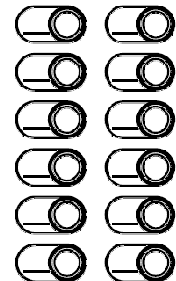

Vanguard fixtures can be ordered quickly and easily by using the simple order form available at www.januselevator.com/vanguard or by calling toll free 800-527-9156.
